

Setting up Skylert Notifications in Skyward Family Access

Skylert is the school's automated notification system that provides emergency alerts and attendance notifications via phone call, e-mail and/or SMS (text message). Parents/guardians have a great deal of control over how to receive these messages. This can be configured as shown in this guide.

To begin, you will need to login to your Family Access, which every guardian has. If you do not remember how to access your account or do not know your account information, go to the Skyward Login page at www.lutherhigh.org/skyward and click "Forgot your Login/Password?" If you experience any difficulties, contact your school's main office.

Setting Up Skylert Options

After logging into your Skyward Family Access account you should see a screen that looks similar to the one below. From here, click on the **Skylert** option on the left.

A Skylert screen similar to the one below will be displayed. This shows your current settings for receiving notifications.

The screenshot shows the 'Family Access' interface in a Mozilla Firefox browser. The URL is <https://sky0.egrps.org/scripts/wsisadll/WService=wsEAplus/sfskylert001.w>. The page title is 'Family Access' and it features the 'SKYWARD' logo. A navigation menu on the left includes 'Home', 'Attendance', 'Student Info', 'Portfolio/Report Cards', 'Skylert', and 'Login History'. A 'My Account' and 'Exit' link is in the top right, along with a 'District Links' icon. A message box states: 'Skylert enables you to receive notifications concerning your child(ren). You have control over which notifications to receive and how you would like to receive them.' A 'Save' button is located in the top right of the form area.

The main form is titled 'My Skyward Contact Info' and contains the following sections:

- Contact Info:** A table with columns for 'School Hours Emergency', 'Attendance', 'General', 'Non-school Hours Emergency', and 'Survey'. It includes fields for Primary Phone, Cell Phone, and Work Phone, each with a dropdown menu and a 'Phone:' label. The 'Family With' row is selected, and all notification options are checked.
- Additional Contact Info for Family With:** A table with the same columns as above. It includes fields for 'Additional Phone 1', 'Additional Email 1', and 'Text Message Numbers' (Phone 1). The 'School Hours Emergency' option is checked for all three rows.

The options are described below:

School Hours Emergency – Any emergency that happens during the school day, including school closings or lockdowns.

Non-school Hours Emergency – Any emergency that happens before school starts or after the school day ends including school closings, delays, or lockdowns.

Attendance – Attendance notifications will only be made when your child has been marked absent and the school has NOT received confirmation from the parent. The time of these calls will differ by school.

General – General notifications will ONLY be sent to the home email address. They include general information coming from the district, building, or teacher.

Survey – Surveys will ONLY be sent to the home email address.

To setup options for which notification you wish to receive, simply check the box in the appropriate column.

Save

If you make any changes, be sure to click Save before exiting this screen.

You are able to change the phone numbers or email address on file with the district here.

Use the additional phone and email fields to add other parent/guardian, emergency contacts, child care, etc that do not have an account

Enter mobile numbers here if you wish to receive Alert Text messages from the District

By default, SMS text messages will NOT be sent. If you would like to receive text messages, be sure to enter your phone number under the "Text Message Numbers" field and check the boxes of the types of text notifications you would like to receive. Enter only numbers – no dashes, spaces, parenthesis or other characters.

If there is another phone number that needs to be called that doesn't appear in your notification fields, you can add that to Additional Phone 1. When multiple phones are selected, the system will call each phone number, starting with the Primary Phone and continues through the list up to three times until it receives an acknowledgement that the message has been received.

If you want to add another additional number, email address, or number for text messages, please have another parent or guardian log into Skyward Family Access to add the information.
